OBJECTIVE

To the Hiring Team

I am incredibly excited to express my interest, in the Back End Developer position at your company. As a software developer who specializes in PHP and Laravel I am confident that I can make a contribution to your teams capabilities.

Throughout my career I have gained, over 2 years of experience working with PHP and Laravel. During this time I have developed a range of applications, including e commerce platforms and data driven systems. This journey has not deepened my understanding of back end development principles. Has also allowed me to refine my skills in writing efficient and well documented code.

Best regards,

Hagop Bazarbashian

EXPERIENCE

Yerevan Oct 2022 - Present

Laravel Developer

Softconstruct

Throughout my time working as a Laravel Developer I showcased my expertise in PHP and the Laravel framework to construct web applications. I adeptly. Resolved software glitches, guaranteeing smooth system functionality. Furthermore, I. Executed a payment system that enhanced transaction processing and improved user satisfaction. As a result of my efforts there was a 20% boost, in payment processing efficiency and a substantial decrease, in system errors. Additionally I collaborated seamlessly with cross functional teams to deliver top notch projects within specified timelines.

Yerevan Dec 2021 - Present Back End Developer Webex

Position: Back-End Developer (Laravel PHP) Company: Webex Tech I have experience, in creating web applications that handle data

processing and visualization. My specialization lies in writing API code for applications. I have worked closely with teams, from departments ensuring collaboration and managing updates to ensure accuracy. Some notable projects I have worked on include designing an online school page developing a website for a mega store implementing a water tank control system and creating APIs for applications. To showcase my skills and versatility I have built a portfolio of self made web pages.
